

GJS-2004

Features

- The closure adopts mechanical sealing structure. There is one oval shaped cable port entrances in base. The big entrance is used for the sealing of uncut straight-through fiber cable, the small ports are used for branch fiber cable and drop cable.
- To adopt engineering PC plastic with high-strength to make the closure has longer life time and excellent sealing performance.
- It can be installed two 1:16 or two 1:8 or 1:4+1:8 module PLC splitter which with our special design in max. or two bare PLC splitter.
- There are different drop cable elements to be chosen (Φ5, Φ7, 2*3). Max. 40pcs drop cable input/output (special type can be customized).
- The patented sealing structure keep good sealing performance after re-entry and re-using.
- It could save the installation time and improve work efficiently.

Applications

- ◆ Suitable for bunchy & ribbon fibers
- ◆ Aerial, underground, wall-mounting, hand hole-mounting and duct-mounting
- ◆ It's especially applicable to FTTH optical fiber distribution
